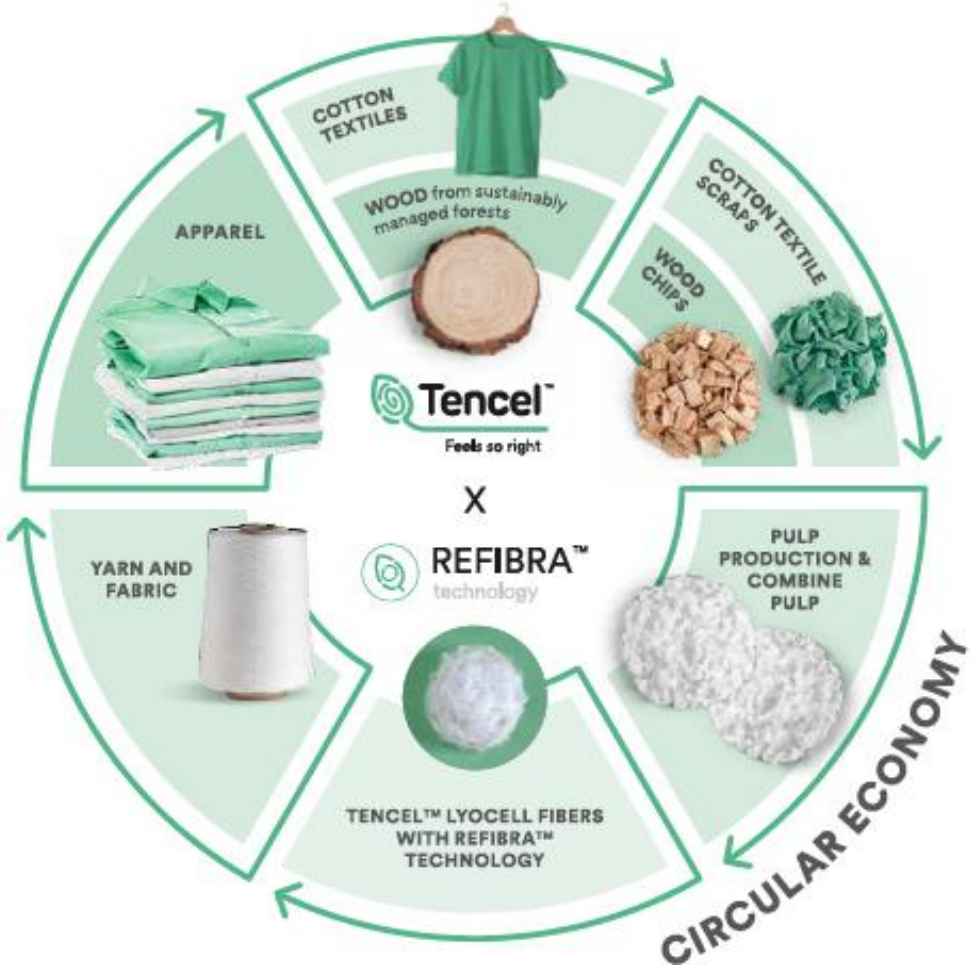
What are TENCEL™ x REFIBRA™ fibers?

Tencel™ Feels so right x REFIBRA™ technology

Our contribution to circular economy

Launched in 2017, TENCEL™ Lyocell fibers with REFIBRA™ technology now feature up to **30% of recycled raw material content from pre-consumer cotton textile waste.**

Lenzing's **five-year vision** is to raise the industry bar by producing fibers with REFIBRA™ technology by having **up to 50% recycled content from post-consumer cotton textile waste by 2025** to make textile waste recycling as common as paper recycling.



Available fiber types

REFIBRA™ technology

- Lyocell Filling fibers
- Lyocell Standard fibers
- Lyocell Low-fibrillating fibers
